

RESEARCH PROJECT WORKBOOK & GUIDE

NAME: _____

SACE NUMBER: _____

RESEARCH PROJECT A OR

RESEARCH PROJECT B

After reading the first 5 pages of this workbook you will decide to do Research Project A or Research Project B. Come back to the cover and tick or colour in the box next to the Research Project you select.

The research framework for Research Project has 4 parts:

1 Initiating and planning the research

2 Conducting the research

This becomes your

FOLIO

3 Producing the research outcome

This becomes your

**RESEARCH
OUTCOME**

4 Evaluating the research

This becomes your

EVALUATION

if you are doing
Research Project B

If you are doing
Research Project A
there is a

REVIEW

This book is colour coordinated so you can go to the relevant colour tabs for each section of work and use the Table of Contents on the following pages.

Contents

ABOUT THE RESEARCH PROJECT	3
About Research Project – for students	4
About Research Project – for teachers	5
The research framework for Research Project has 4 parts	6
YOUR FIRST DECISION	11
You have to do 3 things for Research Project A	13
You have to do 3 things for Research Project B	14
FOLIO	15
Folio Performance Standards	17
Online advice	18
Folio checklist	19
1 Plan your research	20
<i>P1 Thorough consideration and refinement of a research question</i>	
What is your topic?	22
Brainstorm possible topics	22
Still not sure where or how to start?	24
Idea generation: examples	24
Write your own list of ideas	25
Explore your topic	26
Start your Journal	28
Explore your Research Topic with Lotus Diagrams or Mind Maps	30
Lotus diagram example: Slavery	31
Lotus diagram example: Environment – Fill in the gaps	32
Lotus diagram: Fill in your own	33
Mind map example: Cars	34
Mind map: Fill in your own	35
List all your possible topics	37
Journal	38
Develop guiding questions to help organise your research	40
Guiding questions: Example	41
Your guiding questions: First go	42
Your guiding questions: Second go	43
Journal	44
Turn your topic into a research question	46
Is it a thoughtful, creative and focussed question requiring challenging and provocative research?	47
Examples of refining research topics using guiding questions	48
Use this table to refine your research question	49
Journal	50
Online advice	52

<i>P2 Thorough planning of research processes that are highly appropriate to research question</i>	
Plan your research	55
How do you know that you are planning properly?.....	55
Online advice.....	56
Plan your proposal	57
Sample proposal Mind Map.....	58
Proposal Mind Map.....	59
Writing your proposal	60
Select and plan your research processes	62
Primary and secondary sources	62
Qualitative and quantitative information	62
Research processes	63
Planning your research processes.....	64
Example	64
Fill in this research processes planner	66
Write a weekly research planner.....	68
Example	68
Simple research planner	69
More detailed research planner	71
Journal	76
Referencing primary and secondary sources.....	77
Keep a record of all the sources that you use	77
How to reference	78
<i>D4 Thorough and informed understanding and development of one or more capabilities</i>	
Choose a Capability.....	83
There are 7 capabilities	83
Select your Capability	84
Writing about your Capability	87
Journal	88
Plan ethical research	89
How I will develop ethics during research.....	91
Example of how to write about ethics	92
Journal	94
Select how to present your Research Outcome	95
Write your proposal.....	96
2 Do your research; Analyse your research	97
<i>D1 Thorough and highly resourceful development of the research</i>	
<i>D2 In-depth analysis of information and exploration of ideas to develop research</i>	
<i>D3 Highly effective development of knowledge and skills specific to the research question</i>	
Source analysis.....	99
Example	100
Summarising the source analysis	111
Interviews.....	115
Questioning – Open and closed	115
Example	116
Limitations of your interview.....	117
Journal	118
Surveys	119

RESEARCH OUTCOME **143**

Research Outcome Performance Standards	145
Research Outcome checklist	146
Choose your Research Outcome	147

1 Compose your Research Outcome **149**

S1 Insightful synthesis of knowledge, skills and ideas to produce a resolution to the research question

Identify your audience.....	151
Guiding Questions and Key Findings	152
Example: Slavery.....	152
Online advice.....	155
How do I write about Key Findings?	158
Example	158
Key Finding 1.....	160
Key Finding 2.....	162
Key Finding 3.....	164
Key Finding 4.....	166
Key Finding 5.....	168
Key Finding 6.....	170
Key Finding 7	172

2 Reference your Key Findings **174**

S2 Insightful and thorough substantiation of key findings relevant to the research outcome

Reference all key findings	176
Online advice.....	177
Reference a survey using graphs.....	178
Example	178

3 Express your ideas	180
<i>S3 Clear and coherent expression of ideas</i>	
Express your ideas clearly and coherently	182
Online advice.....	183
Headings.....	184
Examples of headings – Slavery.....	184
Drafting headings for your Research Outcome.....	185
Use your key findings to structure your Research Outcome.....	186
How to write paragraphs.....	186
Research Outcome sample plan.....	188
Structure your Research Outcome.....	189
Other Research Outcome structure ideas	194

REVIEW 195

Review performance standards.....	197
Online advice.....	198
<i>R1 Review of the knowledge and skills developed in response to the research question</i>	
Knowledge and skills.....	200
Introduction.....	202
Review your skills	203
Review your knowledge.....	206
<i>R2 Discussion of decisions made in response to challenges and/or opportunities</i>	
Discuss the decisions you made when problems appeared.....	210
Online advice.....	211
<i>R3 Reflect on the quality of the research outcome</i>	
Quality of your Research Outcome.....	218
Online advice.....	219
The successes of your Research Outcome	220
Have you communicated clearly?	224

EVALUATION 225

Evaluation Performance Standards	227
<i>E1 Insightful evaluation of the research processes used, specific to the research question</i>	
Insightful evaluation of research processes	229
Online advice.....	230
Introduction	232
Ranking your research processes.....	233
Write your Evaluation.....	236
Sample structure for paragraphs.....	236
<i>E2 Critical evaluation of decisions made in response to challenges and/or opportunities specific to the research processes used</i>	
Online advice.....	241
Critical evaluation of decisions.....	243
<i>E3 Insightful evaluation of the quality of the research outcome</i>	
Online advice.....	247
Evaluate your Research Outcome	249
<i>S3 Expression of ideas</i>	

Your first decision

Research Project A

OR

Research Project B?

THINK

What are your strengths? Writing or speaking?

DO

Look at the next two pages and see what Research Project A and Research Project B ask you to do.

DISCUSS

Discuss the differences between Research Project A and Research Project B with your teacher/mentor.

DECIDE

Make a decision then go to the front cover of this book and select Research Project A or Research Project B.

Folio checklist

Go through this checklist, ticking each task when finished.

Tick the last column after your teacher has checked your work.

1. Plan your research		Page	Teacher check
P1 Thorough consideration and refinement of a research question			
	Brainstorm possible topics	22	
	Explore your topic	26–37	
	Start your journal	28	
	Develop guiding questions to help organise your research	40–43	
	Turn your topic into a research question	46–49	
P2 Thorough planning of research processes that are highly appropriate to the research question			
	Plan your research	55–56	
	Plan your proposal	57–61	
	Select and plan research processes: primary and secondary	62–67	
	Write a planner	68–76	
D4 Thorough and informed understanding and development of one or more capabilities			
	Select your capability. Record development in proposal, planner, journal and analysis of sources	83–88	
	Write how Ethics relates to your research. Show development in your proposal, planner, journal and analysis of sources	89–94	
	Select mode of research outcome	95	
	Write proposal	96	
2. Do your research; analyse your research			
D1 Thorough and highly resourceful development of the research			
D2 In-depth analysis of information and exploration of ideas to develop research			
D3 Highly effective development of knowledge and skills specific to the research question			
	Source analysis: accuracy, bias, credibility, currency, relevance, reliability, validity	99–114	
	Interviews	115–117	
	Surveys	119–127	

We will now go through the Folio performance standards one at a time.

Still not sure where or how to start?

THINK

Think of

- a book or magazine you've read
- a podcast or YouTube video you've watched
- a film you've watched or a story you've heard
- an issue in your local community
- something you've observed in your own life
- an area of interest that you have not been able to explore yet at school

that has made you think, "I'd like to know more about that."

Idea generation: examples

What I saw	What I want to find out
The news and online reports Just how big is the giant Pacific garbage patch?	What does it look like? What technology is there to fix the problem? How do you encourage people and businesses to fix the problem?
The real estate channel How do I make money from doing up houses?	How do you get mould out of the bathroom? How do I fix big cracks in the walls? How do I fix big cracks in the ceiling? What designs sell quickly for a good price?
The news How to stop a nuclear waste dump in South Australia?	What can I do? How do I organise other people? Is it safe?
"Taken" the movie	Modern slavery
Star Wars: The Clone Wars movie	How scary will robots be? What can robots do now? What will they be able to do in the future?
Reading books Your family tree	How did Highland clearances affect South Australia? Why did Prussian people come to South Australia?
Scientific reports online/TV Climate change	What crops can we grow? What is food security?
Online performers How do I make money as an artist or a singer?	What skills do I need? What knowledge do I need?
Online movies How can I make a movie and make money?	What skills do I need? What knowledge do I need?

Write your own list of ideas

What you saw: movie, podcast, story, film, observation, local issue, book, magazine that you have seen	What you want to find out

THINK

Highlight the ones you still like.

Cross out the ones you don't like any more.

Turn your topic into a research question

The table below shows how to develop your topic into a research question through drafting.

Can you see how draft 1 improves in draft 2 and finally becomes a refined research topic at the end?

The third column explains why the draft is a better question than the previous one.

Topic	The Mary Celeste	Is this a research question?
Draft 1	Why is there a mystery about the ship the Mary Celeste?	<ul style="list-style-type: none"> • This question only asks why • The answer will be a description • The answer will not require many research processes • This is the first step from topic to research question • It sounds like a guiding question
Draft 2	What are the theories regarding the disappearance of the crew of the Mary Celeste?	<ul style="list-style-type: none"> • The question has more structure but is still in development • The answer will be a list of descriptions of theories • This question is not seeking analysis
Refined research question	To what extent is mutiny the most likely cause of the abandonment of the ship, the Mary Celeste?	<ul style="list-style-type: none"> • The topic has been refined to the likelihood of mutiny compared to other theories about the Mary Celeste. • Mutiny is provocative and the research is challenging and the researcher must have access to valid and reliable sources. • The research will require analysis of sources and then a judgment

Based on 'The Design of a Research Question', SACE Board of South Australia, 14 June 2013.

Is it a thoughtful, creative and focussed question requiring challenging and provocative research?

To determine if your question needs further refinement, look at the table below and aim for a ranking of 4. Level 1 is not very good, 4 is amazing.

Ranking	Thesis/Problem/Question
4	Student posed a thoughtful, creative question that engaged them in challenging or provocative research. The question breaks new ground or contributes to knowledge in a focussed, specific area.
3	Student posed a focussed question involving them in challenging research.
2	Student constructed a question that lends itself to readily available answers.
1	Student relied on teacher-generated questions or developed a question requiring little creative thought.

Project rubric adapted from Kathy Schrock's *Guide for Educators*
<http://www.schrockguide.net/assessment-and-rubrics.html>

THINK

How you can make your question a challenging, provocative and focussed question?

DECIDE

You could focus it in South Australia or your specific region of South Australia, the Northern Territory or Malaysia.

This means you can survey local people to gather new and focussed data.

DO

- Look at the examples on the next page for how to refine your topic using guiding questions then fill in the table on page 49.
- Write about this process in your journal on page 51.

Use your key findings to structure your Research Outcome

How to write paragraphs

Last line of introduction tells the order of paragraphs.

First line of paragraph is the topic sentence.

TEEEL	
T	TOPIC sentence
E	Explain <i>You might need a definition</i>
E	Example <i>Give examples and refer to your research with footnotes or intext referencing.</i>
E	Elaborate
L	Link back to the question

This structure can be used to organise most, if not all, research outcome presentations

Your key findings become the topic sentences for:

- Each paragraph in your report/essay
- Each page in your PowerPoint
- Each section of your speech
- Each paragraph in your producer's statement to go with your artefact, manufactured article, work of art or literature

Every sentence that you write comes out of the sentence before it:

<p>BIG IDEA macrotheme</p>	<p>Your Research Question (macrotheme or big idea)</p>
<p>Introduction</p>	<p>The first sentence of your introduction comes out of the research question. It is reworded to start the paragraph.</p> <p>The last sentence of the introduction tells the order of the paragraphs. (hyperthemes). These become topic sentences at the beginning of each paragraph.</p>
<p>Key findings hyperthemes</p>	<p>Each topic sentence of each paragraph comes from the last sentence of the introduction (hypertheme)</p> <p>The start of each sentence (theme) comes out of the end of the sentence before it (rheme) even when you are using TEEEL to make your paragraphs. This way every sentence relates back to the research question or macrotheme.</p>
<p>Conclusion</p>	<p>All of the key findings or hyperthemes are drawn together to answer your research question.</p>

<p>DO</p> 	<p>Look at the example on the next page and then start your Research Outcome on pages 189–193.</p>
--	--

The successes of your Research Outcome

Be clear on what you were trying to do with your Research Project, then you can write or speak about how you achieved what you were trying to do.

Give detailed examples of how you achieved what you were trying to do

Example 1

What were you trying to do?

How did you do it?

Example 2

What were you trying to do?

How did you do it?

Critical evaluation of decisions

E2 Critical evaluation of decisions made in response to challenges and/or opportunities specific to the research processes used

500 words

<p>DO</p> 	<ul style="list-style-type: none"><input type="checkbox"/> Write 500 words about the:<ul style="list-style-type: none"><input type="checkbox"/> Key challenges you faced and the decisions you made to overcome them<input type="checkbox"/> Key opportunities you had and the decisions you made to take advantage of them<input type="checkbox"/> Write briefly about the challenges and opportunities, focus on the decisions<input type="checkbox"/> Write about the new learning that happened as a result of your decisions
--	--

You can use the scaffolding below or on the next page.

What got in the way of your research? What were the challenges?	What did you do to overcome this? What good/bad things came out of your decisions?
